

imageRUNNER[®] 3320 series

CORPORATE SYSTEMS

CHALLENGE THE CONVENTIONAL AND EMPOWER YOUR BUSINESS.

The Canon imageRUNNER[®] 3320 Series offers an innovative solution that's designed to meet all the communication needs of your business. Today's business environment is in a constant state of change. To remain competitive, corporate workgroups require solutions that can rapidly adapt and address new market realities, while streamlining costs and improving efficiency. That's why you need the Canon imageRUNNER 3320 Series multifunction business solutions.

Incorporating Canon's MEAP[™] (Multifunctional Embedded Application Platform) architecture, the imageRUNNER 3320 Series offers a complete suite of functionality, and the unique ability to embed diverse and customizable applications that integrate into every aspect of your business workflow.

Designed to fit seamlessly into your existing environment, the imageRUNNER 3320 Series acts as a dynamic central hub for total office automation and management of your most valuable resources—critical business information, ideas, and knowledge.

AND THE NETWORKED OFFICE EMERGES...

With its innovative technology, outstanding reliability, and superior image quality, the imageRUNNER 3320 Series is part of a new generation of integrated business systems.

Canon's MEAP-enabled imageRUNNER 3320 Series includes the imageRUNNER 3320N and imageRUNNER 3320i models. Both are highly advanced digital imaging systems designed to give your business greater control over costs and improved productivity.

This dynamic duo delivers output at speeds of up to 33 pages per minute, with support for advanced digital Copying and Mail Box features, network Printing and Scanning functions, Super G3 Fax capabilities, and the ability to send electronic information across a diverse and ever-changing digital landscape. No matter which model you choose, you'll benefit from Canon's industryrenowned image quality for the most faithful reproduction of text and images.

Best of all, users and administrators are provided with the necessary tools for quick and intuitive operation of all features, whether it be at the device, through a large fullcolor, touch-screen user-interface panel, or at a desktop through Canon-supplied device drivers and utilities.

Both models ship standard with Ethernet network connectivity. *Includes a 10-user version of eCopy Desktop™ software.

COMMUNICATE ACROSS THE ROOM OR ACROSS THE GLOBE.

Using the power of corporate networks and the Internet, the imageRUNNER 3320 Series transforms your one-lane paper trail into a multilane information superhighway.

Universal Send[™] Makes Seamless Workgroup Collaboration a Reality.

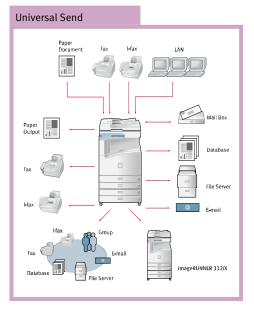

Targeted to workgroups and smaller departments, Universal Send technology (a standard feature of the imageRUNNER 3320i) allows users to scan documents directly into the device for distribution to multiple destinations. These may include group or individual e-mail and Internet fax (I-fax) addresses, network or host folders, and document management applications such as Canon's imageWARE.[™] You can even send documents as Super G3 Fax transmissions (optional). This all-in-one operation eliminates the expense and administrative burden associated with using conventional methods of printing, filing, and forwarding hard-copy documents.

Enterprise-wide Integration Made Easy with eCopy

Convert your imageRUNNER 3320 Series device into a sophisticated yet simple-to-use document distribution powerhouse. With the eCopy Suite of products, your organization can transform paper documents into information that's easily integrated into all your business applications. eCopy connects with your company's e-mail and other networked enterprise applications for secure, economic, and instantaneous distribution and management of information.

Scanning is a Snap with Canon's Network ScanGear

Canon Network ScanGear is a user-friendly, TWAINcompliant scanning utility that can be used with any 32-bit TWAIN-compliant software application to pull scanned images from the imageRUNNER 3320 Series over a network to a destination PC or a file server. Scanned images can then be manipulated at the user's workstation and incorporated into other documents as needed.

MANAGE YOUR CRITICAL ASSETS— INFORMATION, IDEAS, AND KNOWLEDGE.

Digitize your documents and permanently alter your to-do list.

imageWARE[™] Integration

Integrate the powerful scanning capabilities of the imageRUNNER 3320 Series with Canon's imageWARE Office Software Suite for a complete information capturing, management, and distribution system.

With the automatic scanning and indexing capabilities of imageWARE Scan Manager, your business can capture high volumes of documents quickly. Imagine reducing manual labor costs related to scanning by more than 20% and document indexing time by more than 50%! Advanced image capture and data recognition improves the accuracy and usefulness of digitized, computer-based information.

Canon's imageWARE Document Manager is the central database repository of the imageWARE Suite. It has a client-server architecture that can be easily scaled to meet growing business needs, and is designed to reduce or replace traditional hard-copy document storage methods in the general office environment. It also supports high-volume document-handling applications for retrieval, archival, and records management.

imageWARE Scan Manager

Key Vertical Market Applications

Transportation/Warehousing

• Scan and store inventory reports, shipping manifests, and passenger lists into a secure database.

Sales Department

• Scan and edit product information with the most up-to-date specifications.

Facilities Management

• Scan and distribute floor plans and drawings to staff members via e-mail or to a shared network folder.

FEATURES SO ADVANCED. THEY'LL ADVANCE YOUR PRODUCTIVITY.

In addition to its many unique features, the imageRUNNER 3320 Series provides considerable flexibility, from simple copying to advanced, production-level features.

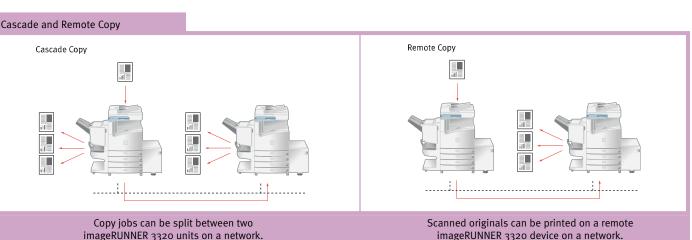

Scan-Once-Print-Many: Leverages inherent digital features by making copies from images scanned and stored in memory, resulting in greater productivity and reduced scanner wear and tear.

Copy Reservation:[™] No more waiting in line at the copier. You can scan up to five copy jobs—complete with their settings—into memory while a current copy or print job is being processed. Users can be notified via e-mail when their copy job is complete and ready for pick-up.

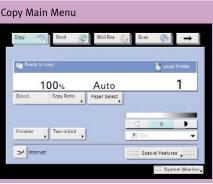

Job Build: Easily combine documents scanned through the document feeder with those placed directly on the platen glass. Also allows users to process jobs that exceed the capacity of the document feeder.

Page Numbering and Forms Composition: Superimposes page numbers and previously scanned images on copies of documents.

Cascade and Remote Copy: Enhances productivity via the connection of multiple imageRUNNER 3320 Series devices on a network.

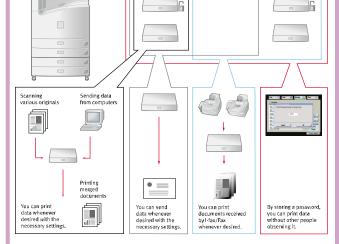

ALL THE TOOLS TO SIMPLIFY YOUR JOB, SO DOING YOUR BEST IS SIMPLER, TOO.

The imageRUNNER 3320 Series supports Mail Box functions that may serve as your centralized system for information-sharing, on-site document storage, and print-on-demand applications.

Mail Box Functionality

Confidential Fax Inbox 50 Boxes

The Mail Box function can be used to store hard-copybased originals such as receipts and frequently used forms, as well as print data such as presentations, proposals, and spreadsheets. Once stored in the Mail Box, take advantage of the ability to combine and print documents as one job with the desired settings, or send the job to other destinations. Up to 100 Mail Boxes can be created for individual users, departments, or specific tasks, and then password protected for security. For visual confirmation that the selected file looks just as you want it, you can preview the document either at the device or at your desktop using a Web browser.

Key Vertical Market Applications

Human Resources Department

• Store frequently used forms, such as employment applications and medical forms, for printing at the time—and in the quantity—needed.

Project Teams

• Combine scanned images with spreadsheets and files created in different applications for professional-looking reports.

Administrative Personnel

• Send data to the device for secured printing at a more convenient time.

NETWORK CONNECTIVITY SHOULD NEVER BE AN AFTERTHOUGHT.

Each model in the imageRUNNER 3320 Series ships standard as a fully network-connected device, providing your workgroup with the ability to leverage its functionality over multiple users and multiple tasks.

When It Comes To Network Printing, Nobody Does It Better Than Canon

The imageRUNNER 3320 Series delivers printing capabilities that are ideally suited to handle the demand of your work-group's printing requirements with support for PostScript[®] 3^{TM} emulation and PCL 5e/6 page description languages.

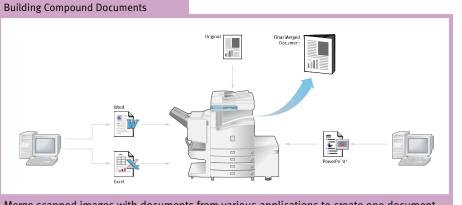

Intuitively designed print drivers allow you to start the document creation process right from your personal computer with the ability to access page layouts, document finishing, and image quality settings. Canon has also equipped this system with extensive advanced features, including the following:

 Store – Send print jobs to personal Mail Boxes for integration with other printed or scanned data, creating new compound documents.

- Secured Print Allows for printing to begin at the device only upon entry of a confidential PIN.
- Edit and Preview (Page Composer) Combine and print documents that were created in different applications as a single document, preview and manipulate the merged file through a thumbnail view, and change settings on-the-fly.

Create Professional-looking Output

Together with the imageRUNNER product line, Canon's imageWARE Publishing Manager and imageWARE Document Composer provide a complete solution for document creation and optimal output. The result is simplified production of professional-looking documents requiring various inserts and content types, such as manuals, brochures, catalogs, proposals, reports, books, and presentations.

CONNECTIVITY SOFTWARE TO MAKE LIFE UNCOMPLICATED.

Make use of the comprehensive device management utilities and security features offered by the imageRUNNER 3320 Series to control and manage resources from any location.

User Authentication

Enable Department ID Mode to limit access to the imageRUNNER 3320 Series to those users assigned valid IDs and passwords. You can set volume ceilings and restrict or enable access to copy, scan, and print functions for up to 300 departments or users. An optional Control Card/Card Reader system manages usage through intelligent cards that must be inserted in the system before granting access to functions. What's more, Simple Device Login (SDL) and Single Sign-on (SSO) allow users to enter personal IDs and passwords to gain system access, with SSO linking directly to the Microsoft[®] Active Directory for user authentication.

imageRUNNER Security Kit

Your information is a vital asset and one that should be protected at all times. That's why Canon offers the imageRUNNER Security Kit, a software package that initiates the overwriting of hard disks and completely erases previously stored data. This allows you to safeguard critical information in order to protect the interests of your work environment.

Canon Print Server Appliance

The Canon Print Server Appliance (PSA) is designed to help administrators manage enterprise network printing. When the PSA is first connected to a network, it will automatically discover all print devices, create print shares for those devices, and publish them on an intranet page generated by the appliance. From this intranet page, end-users can download the driver—with a single click—and start printing, resulting in increased efficiency and ease-of-use.

Simplified Device Management

To truly support customer requirements, networked devices must be easy to install, seamlessly integrate into existing network environments, and permit management from anywhere. Canon's comprehensive solution to this is embodied within Canon's Remote UI[™] utility and NetSpot[®] Suite. Remote UI provides end-users with real-time system access and information at their fingertips using a standard Web browser. NetSpot Suite is a group of utilities designed to ease the administrative burdens associated with installing, monitoring, and managing Canon and third-party print devices on corporate enterprise networks.

ENDLESS POSSIBILITIES TO INCREASE EFFICIENCY.

Utilize a unique, customizable platform designed solely for your specific business applications.

Tailor Your System to Work the Way You Want

Canon is set to transform the way you work. For the first time ever, your business needs come before anything else. Through consultation, a personalized platform can be developed to fulfill your precise applications, providing unparalleled workflow benefits that are both affordable and highly effective.

Java-based Open Platform Offering Unlimited Uses

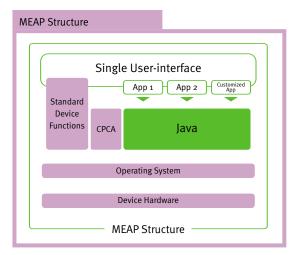

Canon's MEAP (Multifunctional Embedded Application Platform) architecture is based on familiar Java standards and presents highly flexible possibilities. With Canon's MEAP technology running inside imageRUNNER 3320 Series devices, additional applications can be easily installed and integrated, making it possible to control and manage any aspect of document workflow. The result is ultimate and total integration of your business needs.

To learn more about Canon's customizable development platform, contact your local Canon-authorized Dealer or visit Canon's Web site at **www.usa.canon.com**.

*Screens shown as seen on an imageRUNNER 3320 LCD panel display. Sample applications for illustrative purposes only; actual applications may vary.

TRAVEL BEYOND YOUR GREATEST EXPECTATIONS.

The imageRUNNER 3320 Series offers all the tools you need to dramatically improve workflow and maximize performance.

Automate Your Business

Don't settle for a device that simply delivers the basics. Let the imageRUNNER 3320 Series maximize the efficiency of your corporate workgroup. Its standard, 50-sheet capacity Duplexing Automatic Document Feeder makes quick work of scanning multipage and different-size originals. A standard paper capacity of 1,050 sheets can be expanded to support up to 4,550 sheets. With support for numerous paper sizes and weights, transparencies, and envelope feeding, the imageRUNNER 3320 Series can meet the volume requirements of any workgroup.

A choice of two finishers gives you the ability to deliver professional-looking documents that will certainly make you stand out above the rest. Choose the internally mounted Finisher-J1 for basic stapling and collating features. For more advanced document finishing, the optional Saddle Finisher-G1 offers multiposition stapling, saddle-stitched booklet-making, and support for two- and three-holepunched output.

Commitment to the Environment

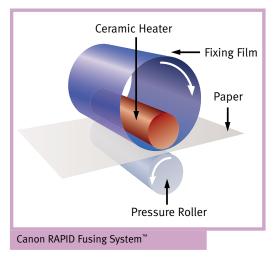

In an extension of Canon's initiatives as a concerned global citizen, the imageRUNNER 3320 Series is designed and manufactured with a number of environmentally friendly features, including a space-saving design and Canon's patented RAPID Fusing System[™] for quick, on-demand operation and reduced energy consumption costs. Efficient use of energy, resource conservation, and clean manufacturing technologies are an integral part of Canon's philosophy.

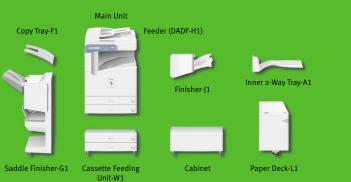

Image of a Leader

As the industry's leading producer of network-connected multifunction devices, Canon continues to set new standards for quality, performance, and reliability. That's why you can trust Canon to provide you with solutions to make your department more productive, and your business more competitive.
